Depok, West Java

Computer Science graduate and Full-Stack Web Development bootcamp participant with a strong foundation in building web applications using JavaScript, React, Redux, and Node.js. Experienced in data management and cloud administration, combining technical programming skills with structural organization to deliver efficient, scalable software solutions.

EDUCATION

Universitas Indraprasta PGRI – Jakarta, Indonesia

Aug 2019 - Aug 2023

Bachelor Degree of Computer Science

3.42/4.00 GPA

- Final Project: Perancangan Sistem Pendukung Keputusan Penerimaan Karyawan Baru Menggunakan Metode Simple Multi Attribute Rating Technique Pada Perusahaan Virgo Jaya. Ensured secure database management of candidate data for HR use.
 - Group Project: Perancangan Aplikasi Keuangan Pada SDIT Bukhari Muslim, replacing Excel-based workflows. Enhanced efficiency in managing income, expenditures, and monthly billing while aligning with the school's complex financial processes.
-

COURSE

Harisenin.com Bootcamp – Remote

Ongoing

Full Stack Web Development

Learning Javascript, React, Redux, and Back-End architectures. Developing full-stack web applications and managing project repositories on GitHub.

PROJECTS

Cinemanian – Full-Stack Movie & Series Management Web App

Tech Stack: React.js, Node.js, Express.js, MySQL, Redux, JWT, Git

- Developed a full-stack web application for managing movies and series databases using Node.js backend and React frontend architectures.
- Designed and optimized a structured MySQL relational database featuring 3 interconnected tables (*Series_Film*, *Genre*, *Series_Genre*).
- Implemented secure backend authentication using JSON Web Tokens (JWT), custom middleware, and managed complex frontend global states utilizing Redux.

Personal Portfolio Website

Tech Stack: React.js, Tailwind CSS, Vercel, GitHub

- Designed and deployed a highly responsive personal portfolio website featuring a modern dark-mode UI to showcase web development projects and technical skills.
- Optimized code structure and asset loading for fast performance, implementing automated CI/CD deployment via Vercel integration with GitHub.

React-Redux – Chill Movie Application

Tech Stack: React.js, Redux, JavaScript (ES6+), HTML5, CSS3, Git

- Built a dynamic and responsive web application implementing React-Redux for highly efficient frontend global state management.
 - Developed modular UI components and handled clean state-driven logic to ensure a seamless and interactive user experience.
 - Structured and managed the project repository on GitHub using clean version control practices.
-

WORKING EXPERIENCE

Lembaga Sertifikasi Profesi Informatika – Jakarta Timur, Indonesia

Apr 2024 - Present

Full-time | Office Administrator

Spearheaded end-to-end project administration and high-volume data operations for national professional certifications, successfully digitalizing workflows and managing records for over 10,000+ candidates with zero operational delays also database management, digitalizing workflows, data operations, and optimizing system logic.

- **Project & Data Operations:** Efficiently processed and managed over 10,000+ candidate profiles, 200+ assessors, and 100+ certification schemes on the E-Serkom platform, ensuring high data integrity and seamless exam execution.
- **Process Optimization (Innovation):** Pioneered the transition from conventional stamps to e-meterai (electronic stamps) for financial documents, boosting invoice and receipt processing efficiency by 5x.
- **Financial & Document Control:** Developed, tracked, and archived a high-volume repository of financial and legal documents, including 1,000+ invoices, 1,000+ receipts, 1,400+ official letters, and 50+ MoUs.
- **Digital Asset Creation & Support:** Created step-by-step video tutorials to guide candidates through the E-Serkom application process, drastically reducing user errors and proactively resolving technical issues for both candidates and assessors.
- **Logistics & Distribution Management:** Supervised the secure packaging and tracking of 10,000+ professional certificates, generating over 12,500+ precise shipping addresses to ensure accurate nationwide delivery.
- **Data Security & Cloud Administration:** Established a robust data backup strategy across local drives and Google Cloud Storage, securing all historical records, legal documents, and project assets from 2024 to the present.

Self Employed

Freelance | Research Specialist

Jul 2025 - Sep 2025

- Conducted targeted research to compile structured lists of 200+ entries in specific sectors.
- Collected and organized data on:
